Preface**

These Philippine Bidding Documents (PBDs) for the procurement of Goods through Competitive Bidding have been prepared by the Government of the Philippines for use by any branch, constitutional commission or office, agency, department, bureau, office, or instrumentality of the Government of the Philippines, National Government Agencies, including Government-Owned and/or Controlled Corporations, Government Financing Institutions, State Universities and Colleges, and Local Government Unit. The procedures and practices presented in this document have been developed through broad experience, and are for mandatory use in projects that are financed in whole or in part by the Government of the Philippines or any foreign government/foreign or international financing institution in accordance with the provisions of the 2016 revised Implementing Rules and Regulations of Republic Act No. 9184.

The Bidding Documents shall clearly and adequately define, among others: (i) the objectives, scope, and expected outputs and/or results of the proposed contract or Framework Agreement, as the case may be; (ii) the eligibility requirements of Bidders; (iii) the expected contract or Framework Agreement duration, the estimated quantity in the case of procurement of goods, delivery schedule and/or time frame; and (iv) the obligations, duties, and/or functions of the winning bidder.

Care should be taken to check the relevance of the provisions of the PBDs against the requirements of the specific Goods to be procured. If duplication of a subject is inevitable in other sections of the document prepared by the Procuring Entity, care must be exercised to avoid contradictions between clauses dealing with the same matter.

Moreover, each section is prepared with notes intended only as information for the Procuring Entity or the person drafting the Bidding Documents. They shall not be included in the final documents. The following general directions should be observed when using the documents:

- a. All the documents listed in the Table of Contents are normally required for the procurement of Goods. However, they should be adapted as necessary to the circumstances of the particular Procurement Project.
- b. Specific details, such as the “*name of the Procuring Entity*” and “*address for bid submission*,” should be furnished in the Instructions to Bidders, Bid Data Sheet, and Special Conditions of Contract. The final documents should contain neither blank spaces nor options.
- c. This Preface and the footnotes or notes in italics included in the Invitation to Bid, Bid Data Sheet, General Conditions of Contract, Special Conditions of Contract, Schedule of Requirements, and Specifications are not part of the text of the final document, although they contain instructions that the Procuring Entity should strictly follow.
- d. The cover should be modified as required to identify the Bidding Documents as to the Procurement Project, Project Identification Number, and Procuring Entity, in addition to the date of issue.
- e. Modifications for specific Procurement Project details should be provided in the Special Conditions of Contract as amendments to the Conditions of

Contract. For easy completion, whenever reference has to be made to specific clauses in the Bid Data Sheet or Special Conditions of Contract, these terms shall be printed in bold typeface on Sections I (Instructions to Bidders) and III (General Conditions of Contract), respectively.

- f. For guidelines on the use of Bidding Forms and the procurement of Foreign-Assisted Projects, these will be covered by a separate issuance of the Government Procurement Policy Board.

LINEN LEASING AND LAUNDRY OUTSOURCE SERVICES CY 2022

1. BACKGROUND / RATIONALE

- 1.1 The Valenzuela Medical Center, a DOH retained Hospital and existing under the laws of the Republic of the Philippines, with office address at Padrigal St., Karuhatan, Valenzuela City is a tertiary medical center. Currently operates 150 beds and hospital support facilities for ancillary services. Much is still to be done to maximize its capacity for the provisions of quality healthcare service to the numerous patients it serves and will continually serve. Several operational systems had to evolve to align itself to the increasing demand for improved quality in patient care. It is in this context, that VMC recognizes the need to focus more on its core competency which is on direct patient hospital care.
- 1.2 Healthcare facilities such as hospitals are built with core competencies centered on medical and paramedical services leading towards hospital care services directly provided to patients whether on an in-patient or out-patient basis. While the laundry service is outsourced, the Institute continues to monitor and control linen inventory. The administration of linen services has demanded a lot in terms of investment costs for hospital linen, inconsistent turnaround time for availability of clean linen and increased manpower costs for housekeeping to help out in the linen section. The reality is that non-core processes, such as this, uses up time and effort notwithstanding the funding requirements which is influenced by the need to continuously improve efficiency and productivity.
- 1.3 Recognizing that linen and laundry service is not the core business of VMC, it has become imperative to consider other modes of improving operations without necessarily increasing the cost component.
- 1.4 It is in this regard that VMC acknowledges the need to outsource the Hospital Linen and Laundry Service to external entities who are qualified and well-equipped to provide such services.

Section VII. Technical Specifications

Notes for Preparing the Technical Specifications

A set of precise and clear specifications is a prerequisite for Bidders to respond realistically and competitively to the requirements of the Procuring Entity without qualifying their Bids. In the context of Competitive Bidding, the specifications (*e.g.* production/delivery schedule, manpower requirements, and after-sales service/parts, descriptions of the lots or items) must be prepared to permit the widest possible competition and, at the same time, present a clear statement of the required standards of workmanship, materials, and performance of the goods and services to be procured. Only if this is done will the objectives of transparency, equity, efficiency, fairness, and economy in procurement be realized, responsiveness of bids be ensured, and the subsequent task of bid evaluation and post-qualification facilitated. The specifications should require that all items, materials and accessories to be included or incorporated in the goods be new, unused, and of the most recent or current models, and that they include or incorporate all recent improvements in design and materials unless otherwise provided in the Contract.

Samples of specifications from previous similar procurements are useful in this respect. The use of metric units is encouraged. Depending on the complexity of the goods and the repetitiveness of the type of procurement, it may be advantageous to standardize the General Technical Specifications and incorporate them in a separate subsection. The General Technical Specifications should cover all classes of workmanship, materials, and equipment commonly involved in manufacturing similar goods. Deletions or addenda should then adapt the General Technical Specifications to the particular procurement.

Care must be taken in drafting specifications to ensure that they are not restrictive. In the specification of standards for equipment, materials, and workmanship, recognized Philippine and international standards should be used as much as possible. Where other particular standards are used, whether national standards or other standards, the specifications should state that equipment, materials, and workmanship that meet other authoritative standards, and which ensure at least a substantially equal quality than the standards mentioned, will also be

acceptable. The following clause may be inserted in the Special Conditions of Contract or the Technical Specifications.

Sample Clause: Equivalency of Standards and Codes

Wherever reference is made in the Technical Specifications to specific standards and codes to be met by the goods and materials to be furnished or tested, the provisions of the latest edition or revision of the relevant standards and codes shall apply, unless otherwise expressly stated in the Contract. Where such standards and codes are national or relate to a particular country or region, other authoritative standards that ensure substantial equivalence to the standards and codes specified will be acceptable.

Reference to brand name and catalogue number should be avoided as far as possible; where unavoidable they should always be followed by the words “*or at least equivalent.*” References to brand names cannot be used when the funding source is the GOP.

Where appropriate, drawings, including site plans as required, may be furnished by the Procuring Entity with the Bidding Documents. Similarly, the Supplier may be requested to provide drawings or samples either with its Bid or for prior review by the Procuring Entity during contract execution.

Bidders are also required, as part of the technical specifications, to complete their statement of compliance demonstrating how the items comply with the specification.

		<p><i>[Bidders must state here either “Comply” or “Not Comply” against each of the individual parameters of each Specification stating the corresponding performance parameter of the equipment offered. Statements of “Comply” or “Not Comply” must be supported by evidence in a Bidders Bid and cross-referenced to that evidence. 1. BACKGROUND /
RATIONALE

1.1 The Valenzuela Medical Center, a DOH retained Hospital and existing under the laws of the Republic of the Philippines, with office address at Padrigal St., Karuhatan, Valenzuela City is a tertiary medical center. Currently operates 150 beds and hospital support facilities for ancillary services. Much is still to be done to maximize its capacity for the provisions of quality healthcare service to the numerous patients it serves and will continually serve. Several operational systems had to evolve to align itself to the increasing demand for improved quality in patient care. It is in this context, that VMC recognizes the need to focus more on its core competency which is on direct patient hospital care.

1.2 Healthcare facilities such as hospitals are built with core competencies centered on medical and paramedical services leading towards hospital care services directly provided to patients whether on an in-patient or out-patient basis. While the laundry service is outsourced, the Institute continues to monitor and control linen inventory. The administration of linen services has demanded a lot in terms of investment costs for hospital linen, inconsistent turnaround time for availability of clean linen and increased manpower costs for housekeeping to help out in the linen section. The reality is

	<p>that non-core processes, such as this, uses up time and effort notwithstanding the funding requirements which is influenced by the need to continuously improve efficiency and productivity.</p> <p>1.3 Recognizing that linen and laundry service is not the core business of VMC, it has become imperative to consider other modes of improving operations without necessarily increasing the cost component.</p> <p>1.4 It is in this regard that VMC acknowledges the need to outsource the Hospital Linen and Laundry Service to external entities who are qualified and well-equipped to provide such services.</p> <p>2.
